

Citizen's Guide To Designated Tree List

PREFACE

Trees on this list fit the criteria for specific functions related to parking lot shade, project perimeter definition, and accent. Canopy trees provide the most useful shade and shall be used in strips between parking bays, at the ends of circulation aisles, and fingers between parking stalls. The goal of On-Site Parking Lot trees is to provide 50 percent shading at solar noon on August 21. On-Site Street- Side Perimeter trees shall be used within perimeter park strip areas and on-site street-side planters commonly located contiguous to street-facing property lines, designed to define the project site. Accent trees have special features, which provide accents designed to highlight plazas, project entrances, mid-block crosswalks, and ends of parking bays.

PARKING LOT TREES:

<u>Latin Name</u>	<u>Common Name</u>
Albizia julibrissin	Silk Tree, Mimosa
Celtis sinensis	Chinese Hackberry
